Lab – 03: Responsive Websites and Bootstrap

Objective:

- Learning the concept of responsive website design.
- Practicing how to use media queries.
- Using Bootstrap.

Submission:

- Submission of your work must be made to your GitHub repository.
- All your code must be in a zip file with name your name and roll number as follows, **"Name-Roll-No.zip"**
- Submit a notepad file with the link of your repository.
- **Emailed submissions will be NOT accepted.**
- **Plagiarized work will not be marked**

Task 1: Create an HTML file named "mediaQueries.html", in the responsive folder you will find two images you will need to replicate. You will design them for medium and large screen as well for small and extra small screens. Images are provided in the assets folder.

Bonus Part: When the user hovers over the image below the first button, image moves up **smoothly**.

Task 2: Create an HTML file named "bootStrap.html" and make the following web design making use Bootstrap.

LARGE AND MEDIUM SCREEN

BOX 1	BOX 2	BOX 3	BOX 4

SMALL SCREEN

BOX 1	BOX 2
BOX 3	BOX 4

EXTRA SMALL SCREEN

BOX 1
BOX 2
BOX 3
BOX 4

Task 3: Develop the following form using Bootstrap and CSS.
